

Sales engineer

FlexSol is looking for a part-time sales engineer that can strengthen our sales department. We are looking for someone that is excellent in communicating the unique selling points of our solar powered products. You have strong technical knowledge and are able to explain the advanced technology to our clients. Furthermore, you are fluent in English and Dutch.

FlexSol Solutions is a young, high-tech company located on the TU campus. We make various innovative solar powered products, such as autonomous light poles and solar roof tiles.

Are you interested in joining our young and ambitious team? Let us know!

What will you do?

You will be part of a small team and are responsible for selling our solar powered products. This will include:

- Handling customer inquiries
- Creating new sales and business opportunities
- Identifying customer's needs and create a fitting (customized) solution together with the engineering department
- Developing long-term relationships with customers (mainly through phone and e-mail contact)

Your profile

You are entrepreneurial and have great social skills. You are independent, like to take initiative. You enjoy an informal work atmosphere and flexibility. Your qualifications:

- Sales or business background
- Excellent communication and customer relationship skills
- Affinity with (solar) technology
- Fluent in English & Dutch

Interested?

Send an e-mail to info@flexsolutions.com with your CV and letter of motivation!
